### HIGH RAW MATERIAL PRICES FUELED BY STRONG SURGE IN DEMAND

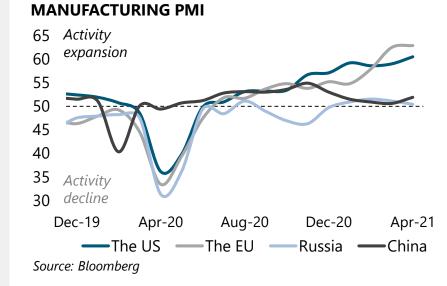

## Business activity in Q1'21 remained strong in all key regions

## Steel demand trends vary across geographies

- In the US, demand grew qoq in Q1'21 accompanied by a sharp increase in imports, supported by record high prices due to a local supply shortage
- In the EU, demand growth was capped by slow automotive market recovery
- After abnormally strong Q4'20, consumption in Russia and China was lower qoq partially due to seasonality

#### Iron ore prices remained strong supported by seasonal scrap shortage and solid demand from Chinese mills

Australian HCC prices remained volatile but were up qoq driven by robust demand from key importers while prices in China continued to rise due to import ban and supply disruptions in Mongolia

NLMK's tailings dam was put into operation in 1984

Tailings dam development plan was independently audited

**Emergency preparedness is regularly assessed and response procedures are developed** 

Safety drills are regularly performed with the participation of Russia's Ministry of Emergency Situations

Water recycling system is in place

NLMK responded to the Church of England Pensions Board request

DAM SAFETY is ensured by multi – level checks

## REGULAR EXTERNAL CHECKS

(weekly, monthly and annual checks by state bodies)

REGULAR INTERNAL CHECKS (daily, weekly, monthly, quarterly checks)

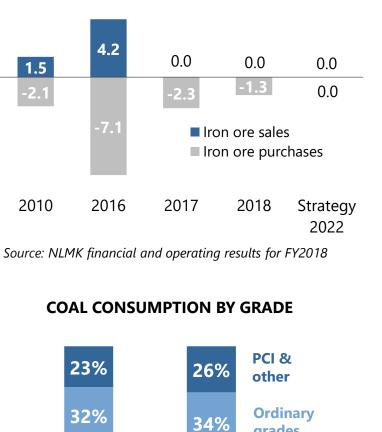

## LESS RELIANCE ON VOLATILE COMMODITY MARKETS

### Gradual decline in reliance on volatile iron ore market

- No iron ore supplies to the third parties in 2017 - 2018 after the launch of the pelletizing plant
- Reduced purchases of third-party's iron ore
- Strategy 2022: 100% self-sufficiency with growing output at the Lipetsk site

## **Consistent optimization of coking coal** consumption

- Phase 1 done: substituted imported coking coal with Russian grades after the launch of optimization measures at the Lipetsk site with no loss in coke quality
- Phase 2 done: to roll out the PCI technology and introduce coking additives to optimize feedstock consumption as well as to raise coke quality
- Phase 3 done: develop upstream technologies (charge stamping commissioned in O3'2020)

## **EXPOSURE TO FX RATES**

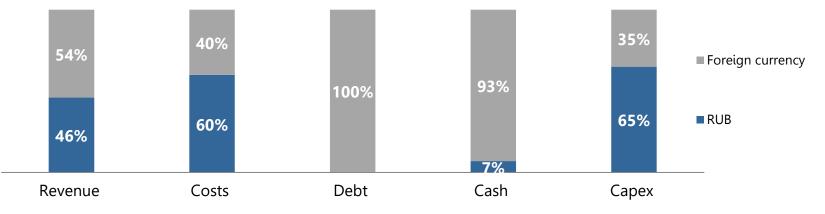

Revenue/cost FX split provides a solid cushion in volatile commodity prices fluctuation

NLMK's EBITDA sensitivity to 1 rub change translates into \$7 m effect on EBITDA on annual basis

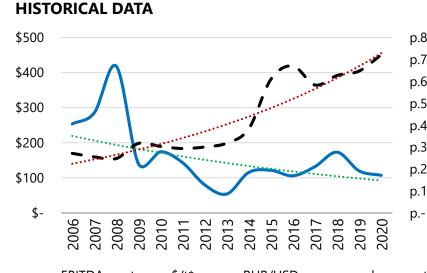

The company's flexibility in sales mix (by product and region) allows to react quickly to FX rate changes

Hedging accounting: the amount of hedged revenue aligns the amount of payments on bonds and bonds' coupons

## COAL PRICES AND IMPLICATIONS FOR NLMK

\$/t

### Russian coal market is oversupplied with 30% of output exported...

 ... hence, Russian coking coal trades with a 30-40% discount vs global

NLMK relies on Russian coal suppliers

### NLMK has over 100% sufficiency in coke (coal processing)

Since Q2'17 90% of BFs at Lipetsk are equipped with pulverized coal injection (PCI) technology

 PCI reduces consumption of coke and natural gas by 30-50%

#### NLMK'S CASH COST OF SLABS

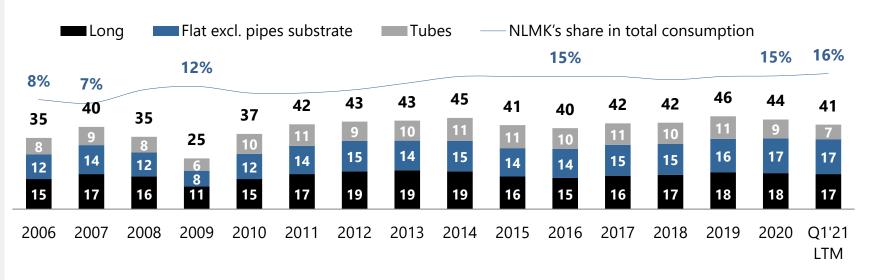

In 2009, the GFC shed almost 10 m t of Russian demand for steel. COVID-19 has had much smaller impact on steel consumption in Russia thus far (mainly in tubes segment)

Since the expansion into long products, NLMK's share has been stable, or ~16% of the Russian ASU

During economic downturns (usually accompanied by FX devaluation) import's share in Russia's ASU tends to decline

## **STEEL IMPORTS IN RUSSIA**

Ukraine is the main steel importer into Russia (40% of imports LTM), particularly of long products

Kazakhstan is the second largest importer (30% of imports), predominately of flat steel

## **STRATEGY 2017 – KEY OBJECTIVES ACHIEVED**

In 2014-2018, Strategy 2017 delivered \$1,348 m of net gains\*, well above initial target

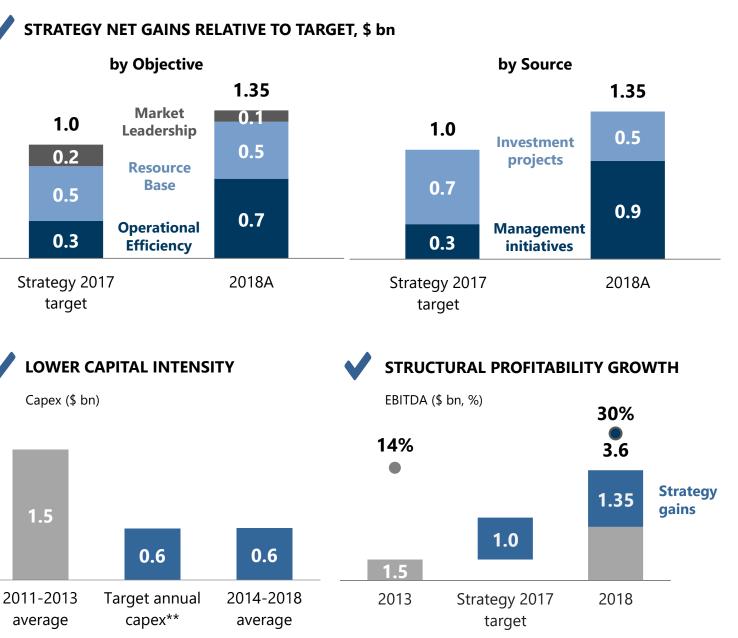

**Operational efficiency projects driven by NLMK Production System contributed c.\$700 m** 

Investment projects mainly focused on upstream operations generated c.\$500 m

Higher downstream capacity utilization and sales growth brought c.\$150 m

Capex was lower relative to previous cycle and stayed in line with target of \$600 m pa

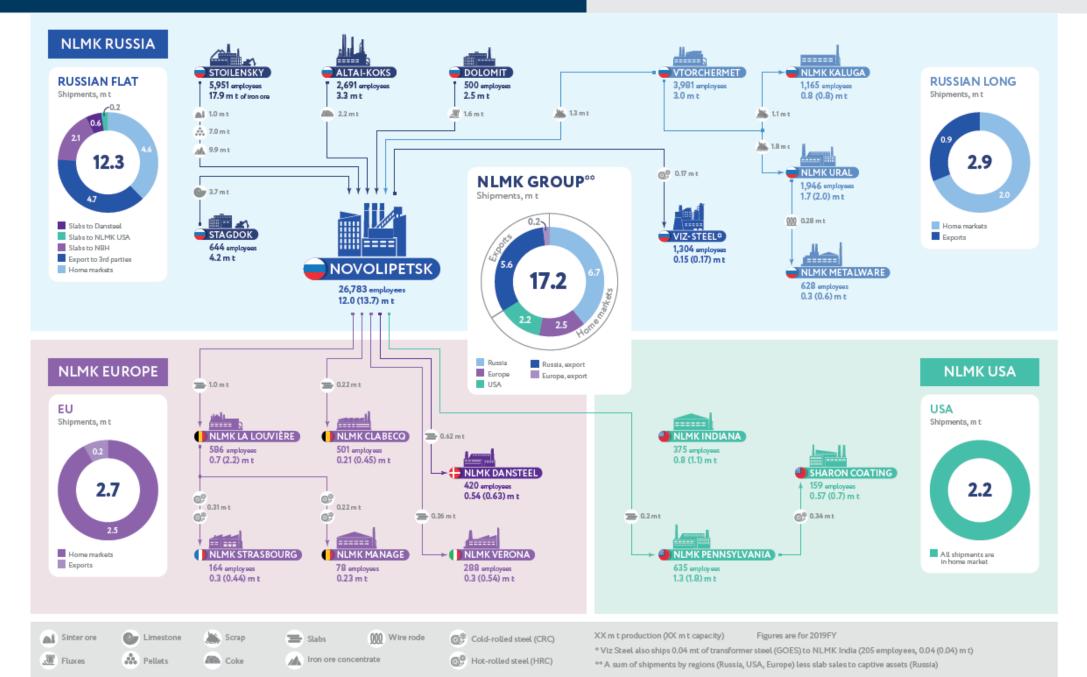

Strategy 2017 projects were the main driver behind profitability growth from 14% in 2013 to 30% in 2018

\*All numbers include NBH results unless otherwise stated

\*\* Updated (reduced) capex target of 2015
